

XLR8 - KMG

Details

XLR8 by KMG available for sale!

XLR8 by KMG is a high-speed, transportable major ride designed for maximum excitement and thrill. Featuring a central rotating hub with four arms extending outward, each carrying four gondolas, XLR8 provides a dynamic spinning experience. This compact ride requires minimal space and can be easily relocated, making it perfect for traveling events and amusement parks.

With a maximum capacity of 16 passengers per cycle, XLR8 offers a theoretical hourly capacity of 640 people. Its modular construction allows for easy setup and maintenance, requiring no special foundation.

More information available upon inquiry.
