Half Pipe - Intamin

Details

Half Pipe from Intamin available for sale!

Half Pipe coaster gets its inspiration from board sports around the world. This thrill ride uses Synchronous Linear Motor technology in combination with a freely rotating ring of seats to produce freefall experiences aimed at recreating the unusual merging of many sensations. With some height, spinning, and dropping, and a pinch of acceleration, you have the unique experience of Half Pipe.

The ride takes you up to 30 meters on each side of the U-shaped track and accelerates up to 70 km/h when coming down. Between the towers is the load/unload area, which guarantees extremely economical space utilization. Half Pipe is well suited to theme parks, indoor parks or even water parks, as a water element can be incorporated with the ride.

Thrill coaster ride with a low footprint. Capacity for up to 16 passengers at once.
