Troika II - Huss

Details

Troika by Huss available for sale.

Troika consists of three arms radiating from a central column. At the end of each arm is a wheel-like assembly (star) holding seven gondolas, each of which seats 2 people side by side, offering a capacity of 42 people at once and theoretical hourly capacity of 1470 people. Troika is described as an ideal family ride with high capacity and smooth ride feel but due to its large size, it is more suited to amusement parks than as a fairground attraction.

More information available upon inquiry.
